DETAILED ACTION

Applicants response filed 11/18/2010 is acknowledged.

New claims 41-44 are added.

Response to Remarks:

Claim Rejections - 35 USC § 112

Applicant states that one of skill in the art would have no issues with the point of attachment of the bivalent X & Z variable CONH. As such the previously presented 11202 rejection is withdrawn.

Note that the X and Z, according the subject matter of the application represent part of the peptide backbone since the formula I represents conformationally restricted peptide mimics. This note is consistent with the maintenance of the following 112-1 rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Previously presented rejection of claims 1-3, 5-8, 10, 36-40 (and new claims 42, 44)

under 35 U.S.C. 112, first paragraph, (because the specification, while being enabling

for few compounds of the elected group wherein X and Z are CONH such that the partial structure of the elected formula I

corresponds to

(peptidic backbone) does not reasonably provide

enablement for the large number of structural possibilities claimed for the X and Z variables) is maintained for reasons of record.

Applicant's arguments were fully considered but are not persuasive. As asserted by the applicant (see withdrawn rejection under 112-2), the instant compounds are peptide analogs. The data presented in the specification is consistent and enabling for compounds with the X and Z are amide linkages and the (only) two compounds wherein X and Z are different show (inconsistent and) diminished activity compared to the corresponding compounds wherein X and Z are amide linkages. As such one of skill in the art would be faced with undue trial and error effort to identify possibilities other than CONH for X and Z variables.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1625

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
